

# Why Choose an **ESH BUILDING?**

In a market flooded with portable shed manufacturers (many of whom focus on high production volume), we are instead committed to a family style business where quality is #1! We build our structures with high quality materials. Plus, we add extra reinforcement and features that our competition does not. With each of our animal shelters, we do our best to make you happy.

# **ANIMAL SHELTERS**

Handcrafted in Kentucky  
& Tennessee

## Horse Run-In Sheds

While horses are outdoor animals by nature, they still need occasional protection from the elements. Our run-in sheds are designed to be an easy, affordable solution to horse shelter. For folks that aren't ready to build a full barn, a horse run-in is the way to go.

- Durable Metal Roof
- Boxed in and finished front overhang
- Trusses with steel gussets
- Walls frame at 24" OC with top and bottom plates
- Wooden wall lining to protect horses and the run-in walls

## 7x12 Hay Feeder

- Holds two round bales
- Choose angles slats, vertical slats, or no slats for the sides

## Dog Kennels

Our custom-built dog kennels can be built in single- or double-run configurations. Both styles feature an enclosed area for your canines to rest out of the elements, plus an outdoor run area for them to get fresh air. Run areas are enclosed with pet-safe chain link fencing. The paint scheme and metal roof colors on each dog kennel can be customized to match your property.

- Durable Metal Roof
- Walls framed at 24" OC with top and bottom wall plates
- Pedestrian access door with window
- Chain-link enclosed run with dog door
- Composite floor in run area
- Sleeping area with window and divider door

## Chicken Coops

The chicken coops we build are constructed from the best materials and individually crafted by our team of experts. Each prefab chicken house is built with a substructure of pressure-treated lumber to resist ground moisture. Painted wood siding and metal roofing protect the exterior; the exact color combination is completely up to you. Virtually every chicken coop we sell is unique!

- Durable Metal Roof
- Walls framed at 24" OC with top and bottom wall plates
- Pedestrian access door
- 4 nesting boxes
- Porch with composite flooring
- Pressure-treated 4x6 runners
- Chicken access door and roosting rack
